SUMMARY

PMP-certified Program Manager with 8+ years of experience leading multimillion-dollar programs across aerospace, manufacturing, and enterprise IT. Experienced in SAP S/4HANA transformation, process improvement, capital projects, and cross-functional execution. Delivered \$2M+ in cost savings while improving manufacturing efficiency, operational performance, and program visibility.

CORE SKILLS

Program and project management | PMO governance | SAP S/4HANA delivery | Manufacturing IT | RAID management | Stakeholder alignment | Risk and issue management | Change management | Executive reporting | KPIs and dashboards | Budget forecasting | Earned Value Management | Estimate-to-Complete modeling | New Product Introduction | Vendor management | Capital project management | Lean Six Sigma | Agile delivery

TOOLS & PLATFORMS

Project Delivery: Microsoft Project, Jira, Confluence, Planview, Smartsheet, Asana, Teams

Enterprise & Manufacturing: SAP S/4HANA, SAP ECC, Oracle, Teamcenter, PLM, MES, PI Historian, PLC/OPC, Maximo

Analytics & Engineering: Power BI, Tableau, SQL, Excel, AutoCAD, SolidWorks, Creo

EXPERIENCE

Dal-Tile, Dallas, TX

Project Manager | Jan 2026 – Present

- Support governance and delivery execution for a multi-workstream \$11.2M enterprise SAP S/4HANA transformation program, spanning five core workstreams, driving readiness, milestone achievement, and executive visibility across the migration lifecycle
- Own critical PMO processes and governance controls, including RAID management, stakeholder communications, delivery tracking, and executive reporting, improving accountability and visibility across the program.
- Facilitate resolution of risks, dependencies, conversion activities, testing gaps, and remediation efforts across business, IT, and implementation partners to reduce delivery and operational risk.
- Established Jira governance and reporting processes supporting initiatives, epics, stories, defects, testing activities, and backlog management, improving execution visibility, delivery accountability, and workstream readiness tracking.
- Develop executive dashboards, governance materials, and status communications used by program leadership to track performance, support decision-making, and drive successful delivery outcomes

BAE Systems, Austin, TX

Technical Program Manager | Mar 2022 – Jun 2025

- Managed TIM-1500 thermal imaging camera repairs (180 units/18 months) and an \$8M ECU power supply program, coordinating engineering, suppliers, production schedules, and delivery milestones.
- Delivered more than \$2M in cost savings through affordability initiatives that reduced labor hours per unit and defect rates by 25%.
- Achieved 95%+ budget forecast accuracy through Estimate-to-Complete modeling, cost tracking, Earned Value Management, and disciplined baseline management.
- Managed complex Bills of Materials across product lifecycle management systems, maintaining SKU-level accuracy, configuration control, and compliance.
- Supported CCA/PWB manufacturing and NPI readiness through BOM control, PLM configuration management, engineering changes, and supplier coordination.
- Managed program risks, supplier performance, export compliance, and executive KPI reporting across aerospace hardware programs.

Stratas Foods, Dallas, TX

Technical Project Manager | Oct 2019 – Apr 2021

- Managed capital and automation projects including a 35-lb packaging line, palletizer retrofit, conveyors, fillers, and case packers; broader initiatives increased capacity 50% and reduced downtime 40%.
- Secured \$3M for facility upgrades through ROI business cases, vendor bids, and capital planning, supported by operational and financial analysis.

- Increased operational efficiency by 15% through Power BI analysis, bottleneck identification, process optimization, and targeted automation improvements.
- Achieved 90% order fulfillment accuracy while supporting production reliability and customer commitments.
- Oversaw vendor contracts, procurement, capital budgets, equipment upgrades, and modernization activities while maintaining safety, compliance, and production continuity.

Metal Tech, Dallas, TX

General Plant Manager | Jan 2019 – Sep 2019

- Directed production, supply chain, logistics, workforce, and vendor operations for a precision manufacturing facility.
- Revamped production and logistics workflows, achieving 100% on-time delivery and reducing material waste by 15%.
- Negotiated with vendors to reduce raw-material costs by 10% while improving supplier compliance and operational reliability.
- Improved ERP accuracy, inventory traceability, and production planning by standardizing SKUs and Bills of Materials.

Halliburton, Rock Springs, WY

Field Engineer | Nov 2017 – Sep 2018

- Led execution of multimillion-dollar drilling and production projects, coordinating field operations, engineering teams, vendors, safety requirements, and operational risks.
- Used real-time analytics to improve equipment performance, reduce downtime, and accelerate field issue resolution.
- Managed vendor compliance and provided performance and risk reports to leadership to support data-driven corrective actions.
- Collaborated with cross-functional engineering teams to develop and implement training and compliance programs.

EDUCATION

University of Texas at Dallas, Richardson, TX - Bachelor of Science in Mechanical Engineering

CERTIFICATIONS

- Project Management Professional (PMP), PMI – May 2026
- Certified Scrum Master (CSM), International Scrum Institute – 2019
- Six Sigma Yellow Belt, NSBE – 2021
